Films

A super way to explore the magic of film.

From its beginning as the home movie media of the 60's, today's Super 8 mm film is alive and well and making it possible for virtually anyone to bring the unmistakable "look and feel" of real film to the screen.

Forty years after its introduction, this small-gauge film still provides an easy, inexpensive way for students and enthusiasts to work at film resolutions and color depths — unmatched by the latest digital technologies.

Kodak has continued to invest in the Super 8 mm business by adding great new products with very high image quality and excellent color reproduction, providing our Super 8 mm customers with another creative tool for their toolbox.

Processing Super 8 mm Films

All KODAK Super 8 mm Films are sold at prices excluding the cost of processing. Your local distributor of KODAK Products or the Kodak web site can provide names and addresses of laboratories which provide Super 8 mm film processing services. Visit www.kodak.com/go/motion for more information. Because of their built-in conversion filters and the ANSI standard cartridge notching system, many manual and automatic Super 8 movie cameras will, in effect, make a slight reduction to the stated film speed.
